

ENVSC 15
Introduction to Energy
Group Project Assignment: Proposal

Each student will participate in a group project which is comprised of an energy source design paper and a presentation of their paper results to the class in the last couple of weeks of class. Students will prepare a 2-4 page proposal for their research project and submit this proposal electronically to the instructor. The proposal will be in times new roman font size 12, double spaced.

A formal, written project proposal is due at the beginning of the seventh week of classes. You are encouraged to propose a topic related to your present activities or interests. Remember to use topic sentences for your paragraphs.

The format for the proposal is as follows:

1. Cover page: Including proposed title and your name. (does not count toward the page count)
2. Project Description / Objectives: What is the purpose or need for your project? (real or hypothetical) What are you doing, and why? What region do you choose? What source(s) of energy will you be investigating?
3. Data sources: What data did you use and where did it come from? (who collected them, when, and why?)
4. Timeline: The schedule you will follow to complete your project during the semester.
