

**GEOL 332 Course Syllabus
Sedimentary Geology
(4 Units)**

**Humboldt State University
Department of Geology
Arcata, CA 95521**

Fall 2015

Lecture: CRN 45670 Section 10 TR 5 PM – 6:20 PM Founders Hall 25

Labs: CRN 45671 Section 11 R 2 PM – 4:50 PM Van Matre 110

CRN 45672 Section 12 M 2 PM – 4:50 PM Van Matre 110

Instructor: Jason Robert Patton

Email: Jason.Patton@humboldt.edu

Office: Founders Hall 22

Phone: 7707.826.3923

Course Website: http://www.science.earthjay.com/?page_id=1722

Office Hours: Monday & Thursday 12:00 PM – 2:00 PM

Prerequisites: GEOL 109, General Geology **Field Trips:** One Weekend Field Trip

Required Textbook:

Prothero, D.R. and Schwab, F., 2013. *Sedimentary Geology*, 3rd ed., W.H. Freeman, New York, NY, 500 p. ISBN-13: 978-1429231558 ISBN-10: 1429231556

Recommended Reading:

Hsü, K.J., 2004. *Physics of Sedimentology*, 2nd ed., Springer, Berlin, 240 p. ISBN 978-3-662-09296-5 (ebk) ISBN 978-3-540-20620-0 (hbk) ISBN 978-3-642-05832-5 (sbk)

Coe, A.L. (ed.), 2003. *The Sedimentary Record of Sea-Level Change*, Cambridge Univ. Press, 288 p. ISBN-13: 978-0521538428 ISBN-10: 0521538424

Nittrouer, C.A., Austin, J.A., Field, M.E., Kravitz, J.H., Syvtski, J.P.M>, and Wiberg, P.L., 2007. *Continental Margin Sedimentation: From Sediment Transport to Sequence Stratigraphy*, Wiley-Blackwell, Malden, MA, 560 p. ISBN: 978-1-4051-6934-9

Required Supplies: three ring binder for class handouts including blank paper for drawing illustrations and notes during class; colored pencils for making illustrations; and the following (field gear = FG; office gear = OG):

1. Waterproof field notebook (available from HSU Bookstore) and hard lead pencil with good quality eraser (FG)
2. Ruler marked in English and metric (SI) divisions (FG, OG)
3. Hand lens (10X is best) (FG, OG)

GEOL 332 Course Syllabus

Sedimentary Geology

(4 Units)

4. Sturdy walking shoes (I will not let you go on field trips without good hiking/working shoes/boots—no kidding!) (FG)
5. Daypack/backpack (FG)
6. Digging tool (sed. rock hammer would work) (FG)
7. Sweater, cap and rain gear (FG)
8. Sample bags (plastic freezer bags are good) (FG, OG)
9. Indelible marker (FG, OG)

Contact: Please don't hesitate to email me with any questions, comments, or concerns. I welcome any feedback or suggestions. The best way to contact me for any reason is by sending an email directly to my HSU email Jason.Patton@humboldt.edu

Fulfills the following requirements: (1) the upper division geology core course for the Bachelor of Science degree with a major in Geology and (2) an option course for a minor in Geology.

Course Description:

Identification and interpretation of sedimentary rocks and structures. Application of stratigraphic and dating methods in the earth sciences. Impact of climate and geologic processes on depositional patterns and facies analysis.

Course Student Learning Outcomes:

- Be able to use sedimentologic and stratigraphic methods and concepts to understand application of scientific method to historical and experimental sciences.
- Demonstrate understanding of "deep time" in geology, methods of estimating relative and absolute ages of rocks, structures and stratigraphic units, and use geologic maps and field observations to interpret regional stratigraphic successions and geologic history.
- Apply basic classifications of sedimentary rocks, structures, stratigraphic units and use geologic maps to interpret regional stratigraphic successions and geologic history
- Communicate effectively in written and oral forms, and demonstrate competence in using research resources including electronic data.

Humboldt State University Student Learning Outcomes:

HSU graduates will have demonstrated:

- Effective communication through written and oral modes.
- Critical and creative thinking skills in acquiring a broad base of knowledge and applying it to complex issues
- Competence in a major area of study.

GEOL 332 Course Syllabus

Sedimentary Geology

(4 Units)

- Appreciation for and understanding of an expanded world perspective by engaging respectfully with a diverse range of individuals, communities and viewpoints.

HSU graduates will be prepared to:

- Succeed in their chosen careers.
- Take responsibility for identifying personal goals and practicing lifelong learning.
- Pursue social justice, promote environmental responsibility, and improve economic conditions in their workplaces and communities.

Grading

Late Assignments are NOT ACCEPTED.

There are NO EXTRA CREDIT opportunities.

Your final grade will be comprised of:

| <u>Summary</u> | <u>Points</u> |
|--------------------------------|---------------|
| Participation | 100 |
| Course Notes and Illustrations | 100 |
| Labs | 360 |
| Weekend Field Trip Report | 100 |
| Research Paper | 140 |
| Video | 100 |
| <u>Lab Final Exam</u> | <u>100</u> |
| Total | 1000 |

There are 1000 points available and grades are assigned by the percentage of total points as follows:

| | | | | |
|------------|------------|------------|-----------|------------|
| 1000-940=A | 939-900=A- | 899-870=B+ | 869-830=B | 829-800=B- |
| 799-770=C+ | 769-700=C | 699-670=D+ | 669-600=D | <599=F |

Communication

The instructor will send announcements via email to the student's humboldt.edu email addresses. Please contact the instructor only via the email listed above. The instructor will respond at their earliest convenience. Students will exchange contact information with their peers on the first day of classes. This is important so that if anyone misses a class, they can contact more than one of their peers to go over the notes and lab materials. Also, students will need to interact during the online portion of this course and having other student's email addresses will facilitate this.

Classroom Conduct

Side conversations among classmates are disrespectful and disruptive to the instructor and your fellow students. Questions or comments about the course material are welcome at all times but should be approached in a respectful manner.

GEOL 332 Course Syllabus

Sedimentary Geology

(4 Units)

The use of cell phones, iPods, or other items that may distract you, your instructor, or your classmates are not permitted during class. All such devices must be turned off.

You may not leave the room during an exam or quiz unless you are ready to turn in your finished exam.

Academic Honesty

You are encouraged to work together to review notes from lectures, to work on problems from the text, and to formulate ideas for any take-home assignments. However, all work you turn in must be your own independent, original work.

In the event that any work is copied from another student, zero credit will be given to all students involved (regardless of who copied from whom).

Any sources of information used in your written work must be referenced (regardless of whether the material was copied word-for-word). This includes your text book and all internet sources (reference these by including the name and URL). Any work including un-referenced material from another source (regardless of whether it was copied word-for-word) will be given zero credit.

More information is available at:

http://www.humboldt.edu/studentrights/academic_honesty.php

Academic Misconduct: Cheating, plagiarism, collusion, abuse of resource materials, computer misuse, fabrication or falsification, multiple submissions, complicity in academic misconduct, and/ or bearing false witness will not be tolerated. Violations will be dealt with according to the procedures and sanctions proscribed by Humboldt State University. Students caught plagiarizing or cheating on exams will receive an "F" in the course.

University Policies

Students with Disabilities: Persons who wish to request disability-related accommodations should contact the Student Disability Resource Center in the Learning Commons, Lower Library, 826-4678 (voice) or 826-5392 (TDD). Some accommodations may take up to several weeks to arrange. <http://www.humboldt.edu/disability/>

Add/Drop policy: Students are responsible for knowing the University policy, procedures, and schedule for dropping or adding classes. <http://www.humboldt.edu/~reg/regulations/schedadjust.html>

Emergency evacuation: Please review the evacuation plan for the classroom (posted on the orange signs), and review http://www.humboldt.edu/emergencymgmtprogram/evacuation_procedures.php for

GEOL 332 Course Syllabus
Sedimentary Geology
(4 Units)

information on campus Emergency Procedures. During an emergency, information can be found campus conditions at: **826-INFO** or www.humboldt.edu/emergency

Academic honesty: Students are responsible for knowing policy regarding academic honesty:
http://www.humboldt.edu/studentrights/academic_honesty.php

Academic dishonesty is willful and intentional fraud and deception to improve a grade or obtain course credit. It includes all student behavior intended to gain unearned academic advantage by fraudulent and/or deceptive means.

Attendance and disruptive behavior: Students are responsible for knowing policy regarding attendance and disruptive behavior:
http://www.humboldt.edu/studentrights/attendance_behavior.php

*** Please note that this document is informational and subject to change.**

Class and Lab Schedule

| Lecture | | | | | Lab | | | |
|---------|-----|------------|--------------------------------------|----------|-----|--------------------------|--|---------------------|

* Field Gear is listed on the syllabus

** Office Lab Gear is listed on the syllabus

Sedimentary Geology

GEOL 332 Course Information

Lectures: Lectures will consist of presentations and discussions led by the professor. There will also be additional peer review papers assigned during the semester that will be discussed during lectures. Papers will be provided one week prior to the day that they are discussed in class.

Reading: The readings are primarily from Prothero and Schwab, *Sedimentary Geology*. This reading is essential to your comprehension of the material in this course and will be a key to your success. In addition, there will be at least one peer review journal article associated with the lab material. The student is expected to read the assignment before class/lab.

Labs: Each week there will be a lab that will incorporate both analog and digital manipulation of data. Specialized software will either be available on campus or freely downloadable from the internet. The labs are due by the beginning of lab the following week, except for the turbidite correlation lab (the due date will be provided).

Lab Final Exam: The lab final is worth 100 points. The exam is a mix of multiple choice, true/false, short answer, and essay questions based on the lectures, labs, homework, and course reading.

Geologic Time Scale: Students are required to commit to memory the major features of the Geological Society of America Geologic Time Scale (linked on the course website).

Participation: Students will be given up to 100 points for participating in class. Full credit will be given if students attend regularly, ask and answer questions in class, and participate in class discussion. When students conduct in behavior that is not respectful (as outlined in the syllabus), they jeopardize their participation grade.

Missing an exam: Make-up exams should be arranged for in advance. In the event of an emergency or sudden illness that prevents you from attending the exam, you must contact me as soon as possible and arrange a time for the exam to be completed before the end of the semester. If you miss an exam (and do not contact me to make it up) or if you arrange a makeup that you do not take, you will receive a zero for that exam.

Course Notes and Illustrations: Each lecture may include handouts and several on-board illustrations that relate to the specific topic being discussed for that day. You will use your notebook to copy and label any illustrations. You are **required** to have a **three-ring binder** containing these handouts and your notes taken during every class. The notebooks will also

Sedimentary Geology

GEOL 332 Course Information

contain all of your course materials (labs, syllabus, exams, etc.). Your material must be well organized within the notebook. These will be evaluated during the lab final. Credit of 100 points is given for careful reproduction of the illustrations including any notes, labels, and graphs.

Library Research: There is one library research assignment that is worth 140 points. The report will be typed in font size 12, double spaced, and turned in electronically by 5 PM, Dec. 15, 2015. The report will be five to ten pages long. The paper will include between 1 and 3 figures and 1 and 3 data plots or tables. Each table, plot, or figure needs to have a caption describing the table, plot, or figure. The filename needs to include the course number, the subject, and your last name, in the following format: GEOL332_sediments_lastname.docx (or *.pdf). The research topic needs to be related to subjects covered in class. Students must use at least three peer review journal articles as references for their research paper. An outline for the paper is due by the beginning of class on Thursday 9/24/15.

Field Trips: We will have one optional weekend field trip to the Cape Sebastian region of coastal Oregon on 11/14/15. Students will collect data in the field and work in teams of about three students. Each student will turn in a field trip report based upon their personal observations and their team's data and notes. Students who cannot make the Cape Sebastian field trip have the option to submit a second research paper, five to ten pages, in the same format as the main research paper, for the same credit as the field trip report. The subject matter for this optional research paper will be related to coastal margin sedimentation. Both (field trip and optional) reports will be typed in font size 12, double spaced, and turned in electronically within a week of the field trip. The field trip reports will be three to five pages long. The filename needs to include the course number, the subject, and your last name, in the following format: GEOL332_field_trip_coast_lastname.docx. The (field trip and optional) reports are worth 100 points.

There are also four field trips that are conducted during the week. Each field trip will involve collecting data, interpreting those data, and submitting a report or handout. These week day field trips contribute to the lab portion of the course grade.

Video: Students will prepare an educational video to be presented in class during the final week. Students will work in teams of about three students. The videos will be about 5 minutes in length. The videos will be posted online, so ensure to document all material that is used (to ensure copyright laws are obeyed). References and credits at the end of the video do not count towards the required time length. Students will review others' videos in class. The grade, worth 100 points, includes the video (students need to demonstrate they worked as a team, as

Sedimentary Geology

GEOL 332 Course Information

evidenced in the credits), the presentation of the video in class, and the review of others' videos in class.

Electronic Presentations: All electronic presentations will be posted to the website for this course. Please use these presentations to review course material and to prepare for your exams and reports.

*** Please note that this document is informational and subject to change.**

Sedimentary Geology

GEOL 332 Course Expectations

Class will start on time at 5:00 PM and the Lab will start on time at 2:00 PM. You are responsible to be present for and be attentive to all the material covered in class. If you need to leave the class early, please let me know before the class starts.

This is a college-level science class, and will require a commitment of your time outside of class. This at-home time will enable you to digest the material we cover in class and help when you are asked on the exams to apply these concepts to different problems and applications.

You will spend 12 to 18 hours per week on course material outside of class, on average. You are encouraged to set aside a specific time each week outside of class devoted solely to each course:

- Reviewing lecture notes and in-class exercises each week
- Reading the textbook
- Studying for the exam

Note that 12 hours per week at home is the average minimum to pass. Some students may require more time at home just to pass; for some in this course that may be enough to get an A. A student who is very attentive in class, asks questions, and takes careful notes will need less at-home time.

Absences: It is extremely difficult to do well in this class without attending all the lectures. I understand there will be an occasional absence due to illness or emergency, however I consider more than two absences per semester excessive. If you do miss a class:

1. Obtain the course material online (PowerPoint slides, extra reading, and handouts). The slides will include information about any homework or in-class exercises that were assigned. Most assignments and handouts referenced by the slides will be in your handouts.
2. Next, try to obtain a copy of lecture notes from a classmate since there are many things we cover that are not spelled out directly on the slides or handouts. This is the most important step.
3. Read the required reading covering the material you missed.
4. After this, feel free to contact me by email with any questions.

Final grade active attendance boost: If your final course grade after rounding to the nearest whole number is within 1 point of a grade transition (C to C+, D to C, A- to A, etc.) I will give you the boost needed to obtain the higher grade if you have actively attended most classes and succeeded in many of the in-class pop quiz questions. More than 2 unexcused absences is

Sedimentary Geology

GEOL 332 Course Expectations

considered excessive and will disqualify you from this opportunity. Conduct not in accordance with that outlined below will also prevent you from receiving this bonus.

Computer skills: This class will require computer use outside of class. Activities involving the 4 skills listed below will be included throughout the semester. In addition, you will be expected to check Moodle and your email regularly for announcements.

1. Send and receive email from your Humboldt State University email account.
2. Open a web browser and access a web page if you are given the web address.
3. Access the course material online (handouts, slides, announcements, etc.).
4. Create, edit, and export Microsoft word (.doc or .docx), Microsoft Excel (.xls or .xlsx) and Adobe .pdf documents. We will also be using specialized software to create, edit, and export files of other formats.

Groups: This class will conduct lab work in groups. Students are encouraged to collaborate by collecting data, taking notes, and sharing these data and results. Some labs will be turned in as a group and for some labs, students are required to turn in individual reports and assignments. See the notes about academic honesty in the Syllabus.

*** Please note that this document is informational and subject to change.**
