

GEOL 106 Earthquake Country

Activity 1: Scientific Method

Last Name, First Name: _____ Date: _____ Points: _____

Part I. Find a partner (or two if need be) and spend 5 minutes discussing the steps of the scientific method. The lecturer presented 5 basic steps in class. Write down these 5 steps below.

1. _____
2. _____
3. _____
4. _____
5. _____

Part II. Now, with the same partner(s), spend 10 minutes discussing an example of the scientific method applied. The lecturer presented an example in class, so you cannot use that one. Think about the steps in part I. If you are challenged with this, remember to begin with step one and go from there! Describe your example below, dividing up your example into the 5 steps from part I.

1. _____

2. _____

3. _____

4. _____

5. _____
